

REMARKS

The subject Patent Application is being filed as a Continuation of co-pending U.S. Patent Application Serial No. 09/474,602, filed 29 December 1999. Accordingly, the Specification of such earlier-filed '602 Parent Application, which included Claims 1-31, is filed for the subject Patent Application. Those original Claims 1-31 are now canceled from this case, and Claims 32-81 are inserted for further prosecution.

It is believed that such insertion of Claims places the case into better condition for Examination, the prompt performance of which is respectfully requested.

The undersigned attorney respectfully requests a personal Interview of the Examiner prior to the Examiner's issuance of a first Office Action in this case.

Respectfully submitted,
For: ROSENBERG, KLEIN & LEE
